

ABSTRACT OF THE DISCLOSURE

5 A print medium to be applied to a printing
apparatus has print areas on which to print desired
images and a discard area or separably provided in at
least one of the front and rear end portions thereof.
The width of the discard area provided in the front
end portion of the print medium is set wider than a
distance from the front end of the print medium
10 accommodating portion to the feeding means and a
distance from the discharge means to the most
downstream position printed by the printing means.
The width of the discard area provided in the rear end
portion of the print medium is set wider than a
15 distance from the most upstream position printed by
the printing means to the transport means.
